INNOVATIVE PROJECT 2021

VERMICOMPOST

Vermicompost is the product of decomposition process using various species of worms, usually red wigglers, white worms and other earthworms, to create a mixture of decomposition vegetables or food waste, bedding materials and vermicast. In our college we are doing vermicompost project with our students.

VERMICOMPOST

This report gives detail about the production of vermicompost. At our campus, the vermicompost project aims to establish sustainable and profitable venture that produces high quality organic fertilizer through vermicomposting. Vermicomposting is an ecofriendly alternative to chemical fertilizer. It enhances the soil health, plant growth and environment. It also minimizes green house emission. The remaining vermicompost are sold in the market.
