### EVENT ON REPORT

Covid -19 has impacted every human being in unexpected and unfortunate ways. The pandemic has had a significant impact on the education system affecting lakhs of schools & colleges across India. The adverse effects of the pandemic on our children are invisible and insidious, with well being and education of poor children being the worst affected.

Apart from the immediate economic impact, Covid – 19 has had a long term impact in jeopardizing future of our children as the pandemic and resulting lockdowns have kept them away from colleges and other educational institutions for nearly two years. While there have been efforts of minimizing the disruption in education through online distance learning practically there have been several challenges due to lack of access to Smartphone's, disparities in education of poor children, urban and rural and even gender bias within families and communities. This has taught us to start investing in digital learning on accessibility and affordability with more urgency.

Sri Raaja Raajan College of Engineering and Technology provided smart phones to help the poor students to continue their education without obstacles. Around 100 students were benefited from this.
