REPORT ON EVENT

DISASTER MANAGEMENT –TRAINING PROGRAMME

(22.08.2016-24.08.2016)

India has been traditionally vulnerable to natural disasters on account of its unique geo-Climate conditions. Floods, droughts, cyclones, earthquake and landslides have been recurrent phenomena. About 60 % of the landmass is prone to earthquake of various intensities; over 40 million hectares is prone to floods; about 8% of the total area is prone by cyclones and 68% of the area is susceptible to drought. In the decade 1990-2000, an average of about 4344 people lost their lives and about 30 million people were affected by disasters every year. The loss in terms of private, Community and public assets has been astronomical.

Disaster Management Training was organized by Indian Red Cross Society for two days at our campus. YRC programme officer, Sri Raaja Raajan College of Engineering and Technology has participated in this training programme on behalf of Anna University. (NDRF) National Disaster Rescue has given various training & taken classes on the topic Disaster Management.
