ENGLISH LANGUAGE LABORATORY

At SRRCET the English language lab is affable and prominent. The importance of the language laboratory has been clearly recognized in our college curriculum's communication-related courses. Any learner who wants to communicate effectively and efficiently must have a strong command of the language. Clarity and accuracy are essential components of effective communication. The method and process used to learn a language are what enable one to achieve such mastery in it. Our Language Lab helps students successfully practice and evaluate their communication skills. As a result, students of all departments are trained to improve the four most important skills: listening, speaking, reading, and writing.

The goal of the English Language Lab is to help students improve their language abilities by using computers to teach language. The Language Lab's computers are linked to the Internet, sound audio setup, LCD (liquid crystal display) projectors, headphones, collar microphones, and computers with updated system.

The lab's technological equipment helps the learner rapidly and easily pickup the language by stimulating their eyes and ears. The collection in the lab is made to help students develop and keep up their aural skills. The language testing facility is extremely helpful for evaluating pupils' speech. It gives students the technical resources to enhance language pronunciation.
